

AMENDMENT TO THE SPECIFICATION

Please cancel the amendment to the paragraph beginning on page 22, line 17 made in the Amendment filed January 7, 2008. The original paragraph is as follows:

Referring now to FIG 1, there is shown an operation block diagram of an exemplary embodiment 100 according to one aspect of the present invention. A signal source 101 in the environment generates a signal 103 that is captured by signal capture block 105, ~~also referred to as an audio capture device, which can be remote as shown in FIGs 2 and 4,~~ and transmitted to signal identification block 110 on line 107. Signal identification block 110 is described in greater detail below. Signal identification block 110 identifies the signal 103 from signal source 101 and passes the identification information (i.e. song ID) to reporting and transaction block 115 via line 113. User identification block 120 additionally provides the identity of the user (not shown) to the reporting and transaction block 115 on line 118, whereby the user may be informed as to the identity of the signal as described more fully in the text accompanying FIG 3 below.
